

Planet Lemon

Birthday Cake S1

Go INTERGALACTIC and reach for the stars with Planet Lemon by T.H.Seeds™! Planet Lemon will take you on an unforgettable journey where you are the star of the show. Experience an energetic high while enjoying the smooth, sweet lemon candy. The Birthday Cake X Birthday Cake parentage brings you a perfect OG Kush type structure with dense flowers and an amazing terpene profile. A different kind of lemon experience. So unique, the structure reminding you of a solid Kush but the smell totally different, more sweet and candy with a hint of sour. Planet Lemon by T.H.Seeds™ has an open structure with good internode spacing, is not too leafy and stretches by a factor 2. She can be wide as the side branches go around and then straight. We advise to top once or twice to get the Planet Lemon more bushy to easier control the lateral branches. A bit of pinching can work as well to stimulate the lateral growth. She can be slow in veg but she gets quicker during the last weeks of veg and then flowers faster than other comparable strains. She is easy to trim, the leaf to flower ratio is great, ideal for making all kinds of extractions. The buds are dense and green with purple tones inside, covered with crystals that shine bright like stars in the night sky. The taste of Planet Lemon is like a lemon meringue pie. A full bodied flavour that fills your entire mouth. The effects are smooth and enjoyable, engaging and perfect for a 16:20 mid day smoke to share with your friends and then grab some munchies.
