

Wy-KIKI

Pink Panties X Banana Candy Krush

Great density and really sticky to your fingers so you better use a grinder or scissors. There are two main phenotypes: A light green pheno with purple undertones and a totally purple pheno with dark, almost black flowers with orange hairs and a little green. Both phenos have an intense smell and huge resin production and are both excellent for making hash with their other-worldly terpene profile. We recommend a drying time of around 10-15 days and hand trimming with an under screen to collect all the resin falling down during the trimming. We always recommend curing it well to get all the true flavors without any chlorophyll left in the dry flowers. Wy-Kiki is T.H.Seeds™'s first public release using a Pink Panties cut, one of the most wanted plants in the world and one of our favorite private smokes since we got her 3 years ago. Now released for all the world, we can't wait to receive your greetings from Wy-Kiki!

SPECIFICATIONS

2-seeds

25€

FEMINIZED

- **TYPE**
60% Sativa - 40% Indica
- **HEIGHT**
110cm - 150cm
